# CORONAVIRUS

- The new (or "novel") coronavirus is one of several known to infect humans. It's probably been around for years in animals. Sometimes, a virus in animals crosses over into people. That's what scientists think happened here. So this virus is not new to the world, but it is new to humans. When scientists found out that it was making people sick in 2019, they named it as a novel coronavirus.
- Coronavirus Disease 2019 (COVID – 19)
- The virus spreads easily from Person-to Person
